The Denso SeaShield 80 system used on the Shelley Beach Park Recreational Jetty.

PROJECT DATA

Location	Shelley Beach Park, Canning River, Perth WA
Contractor	Advanteering Civil Engineers
Client	City of Canning
Products	SeaShield 80
Date	November 2019
Ref No	S040

PROJECT DETAILS

The City of Canning engaged Advanteering Civil Contractors to refurbish the Shelley Beach Park Recreational Jetty.

The refurbishment consisted of abrasive blasting and painting of the steel members, replacement of all timber decking and handrails, and the surface preparation and long term protection of the RHS Steel Piles.

The abrasive blasting and pile protection was undertaken by Franmarine Diving.

In total, 14 piles were protected with the Denso SeaShield 80 system comprising of SeaShield Primer, Marine Piling Tape and Densopol 60 reinforced bitumen tape comprising a polymer adhesive compound backed with a high impact PVC.

The Shelley Beach Jetty and park is an important community asset with its river and city skyline views. The destination hosts a number of year-round events such as the Blessing of the river, Australia Day Celebrations and New Year's Eve fireworks.
