

Denso Has the Solution!

For many years Denso (Australia) Pty Ltd have specialised in providing cost-effective long-term solutions, backed by meaningful warranties to ensure customer peace of mind.

Denso has a team of experienced representatives located around the country who would be happy to discuss your particular corrosion related problem.

Typical areas where Denso can provide effective solutions are...

Problem: The protection of steel structures, tanks, pipelines, cables and pipebridges

Solution:

Denso Steelcoat Systems

Designed to tolerate less than perfectly prepared metal substrates whilst still providing long-term corrosion prevention, these unique range of systems are based on heavy duty liquid coatings, self amalgamating tapes, mastics and void fillers.

ARCHCO  **RIGIDON**
Resistant  Materials

Problem: Resistant linings for process vessels and tanks

Solution:

Archco-Rigidon 400 Series

Medium duty glass flake reinforced lining suitable for immersion conditions in severe chemical environments.

Problem: Resistant linings for stacks, ducts, scrubbers, fan cases, filtration vessels, Ion exchange vessels and water treatment works

Solution:

Archco-Rigidon 500 Series

Heavy duty glass flake reinforced lining suitable for immersion conditions where abrasion and erosion resistance is more critical.

Problem: Resistant linings for process vessels, tanks, concrete bunds, sumps and holding tanks

Solution:

Archco-Rigidon 600 Series

Heavy duty glass flake reinforced lining with a filled base coat for maximum chemical resistance.

Problem: Resistant lining system (primary use on concrete) for holding tanks, treatment tanks, bunds, sumps and channels

Solution:

Archco-Rigidon 700 Series

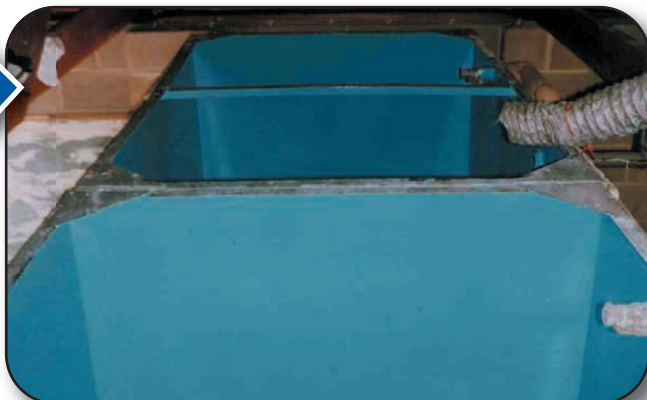

Heavy duty silica glass flake reinforced lining suitable for steel, concrete and flooring protection.

Problem: Protective linings for potable water tanks, cooling towers and air handling units

Solution:

Nu-Tank 400E

A high build epoxy lining system that conforms to BS 6920 and is WRC Approved for use with potable water.

All statements/data presented herein are given in good faith and believed to be appropriate and reliable. However, it is given without express or implied warranty or guarantee. Potential users of our materials are urged to conduct confirmatory trials to satisfy themselves as to the suitability of the selected product for their particular end use, prior to purchase.
