

The SeaShield Series 2000 FD heavy duty marine system shown here on circular steel piles.

Corrosion Prevention for Steel, Concrete and Timber Piles

Cross section showing SeaShield Series 2000 FD system on a hexagonal pile. The picture illustrates the inner primer/tape layer and the outer jacket conforming tightly under pressure to the pile's profile.

SeaShield Series 2000 FD Heavy Duty system provides ultra long-term protection for steel, concrete and timber structures in the splash and intertidal zones.

The SeaShield Series 2000 FD Heavy Duty system can be used to encapsulate jetty piles, offshore riser pipes and exposed piping in the splash and intertidal zones.

The system can accommodate piles with cylindrical and hexagonal sections as well as support members and bracings.

Advantages:

- Proven 30 year worldwide case histories
- No abrasive blast cleaning. Surface preparation with mechanical tools or hp water jetting
- Can be applied to damp and immersed surfaces
- Fast installation
- Controlled application tensioning system
- One piece jackets
- Environmentally friendly

Underwater tape application.

The SeaShield Series 2000 FD Heavy Duty System provides a cost effective and easily applied method for the control of corrosion in the splash and intertidal zones on jetty piling.

The SeaShield 2000 FD closure system:

1. A new hydraulic clamp now rapidly pulls the jacket seams together.

2. This allows the seams to be bolted under improved stretch and tension.

3. Final tightening of the 316 stainless steel bolts.

SeaShield 2000 FD Components:

Denso Marine Piling Tape:
150mm or 300mm x 10m rolls

Jackets:

Custom made to order from 2mm thick, uv resistant HDPE with stainless steel closures

Optional component for badly pitted steel surfaces

SeaShield Primer P:
4kg tubs
