

Premseal Sylbond FB150

DENSO WATERPROOFING SYSTEMS

Description:

Cold applied Sylbond FB150 Waterproofing membrane comprises a reinforced adhesive compound laminated to a synthetic fibre mat. Sylbond FB150 is unique in that the manufacturing process the synthetic fibre mat is off-set so providing one side of the sheet with the selvedge of pure polymer bitumen adhesive, which will amalgamate by a process of cold fusion with the underside of the adjacent overlapping sheet. The side of the sheet opposite to the selvedge is provided with a tongue of uncoated synthetic fibre mat which, when the top coating is applied, provides a double overlock at the seams.

Uses:

Waterproofing of exposed new flats, parapets, box gutters and the joining of new extensions. Also recommended for the maintenance and refurbishing of existing flat roofs etc.

Application:

After application to properly prepared and primed surfaces, the polyester membrane is fully saturated with the selected Sylbond topcoat system to suit the end requirements, to provide an impervious waterproofing membrane capable of absorbing normal substrate movements without cracking or loss of adhesion.

Safety:

Normal hygiene procedures.
Wash hands thoroughly with soap and water or a proprietary hand-cleaner prior to eating or smoking. Launder contaminated clothing, gloves, etc.

Storage:

Store in original containers in a cool, dry place.
Maximum shelf life recommended is 6 months.

Typical Properties:

Thickness after coating: 1.5 mm nominal

Temperature Range (Application): +5°C to 35°C

Temperature Range (Service): -20°C to 70°C

Roll widths: Up to 900 mm

Roll Lengths: 15 m

Weather resistance: Excellent

NB: For estimating purposes, one roll gives a nett coverage of 12.8 m² including overlaps.

Approved Quality Management System
AS/NZS ISO 9001:2008
Lloyds Register - Certificate No Mel 0927759
